

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter provides conclusion and suggestion. After analyzing the data about discourse markers in news articles of The Jakarta Post, the writer present the conclusion and suggestion.

A. Conclusion

Based on finding and discussion, the writer concludes as follow:

1. Referring to research finding above, the researcher found 34 statements of additive markers, 10 statements of causal markers, 4 statements of adversative markers, and 4 statements of temporal markers. So, the dominant types of discourse markers that are used in this news articles is additive markers, this type was 34 times.
2. Based on the analysis that had been done in the previous chapter, the functions that are found are markers of connectives with 40 data, markers cause and effects with 3 data and markers of temporal adverb with 3 data. Out of all the data, the dominant functions of discourse markers that are used in this news articles is connective markers.

B. Suggestion

Based on the conclusion above, the writer gives some suggestion as follow:

1. **For the reader**

This study aims to benefit the readers, specifically those interested in news articles, by enabling them to recognize the words conveyed in news articles. This will enable the readers to capture implicit meanings of sentences.

2. For the next researcher

The aim of this study is to provide a useful contribution and relevant reference for future researchers who wish to analyse the same case. It is intended to give an explanation about discourse markers and offer new ideas about their analysis. This can include textbooks, songs, speeches, talk shows, and any other relevant material.
