

CHAPTER V

CONCLUSIONS AND SUGGESTIONS

In this chapter are include conclusion and suggestion of the research. After analyzes the words of contain of code switching on Deddy Corbuzier's video youtube channel as research topic, it has some conclusion in this research.

A. Conclusions

The writer finally made conclusions the analysis of code switching on Deddy Corbuzier's video youtube channel. After analyzing the research about the types and reason of words contain code switching, it has been concluded some conclusion based on the data of the research as follows:

1. The data have been analyzing, from "Deddy Corbuzier's Video YouTube Channel" found 30 data the types and reason of words contain code switching. The types of code switching used Deddy is inter-sentential and intra-sentential. The reason that Deddy switch one language to another language as listener or interlocutor and speaker.
2. Code switching which found mostly in the types of code switching is Inter Sentential have 19 data (63.3%) while the lower is Intra Sentential have 11 data (36.7%).
3. Code switching which found mostly in the reason of code switching is Listener or interlocutor have 23 data (76.7%), Speaker have 4 data (13.3%), the lower is Change of discussion topic have 3 data (10%),

while The presence of third person and change from formal to informal have 0 data (0%).

The research discusses to know the types of code switching use on Deddy Corbuzier's video YouTube Channel. The writer also classified the result from data analysis which has meaning words. This classification is formed by using the theory from Chaer and Agustina. So, in daily life the event of code switching cannot be avoided, because the majority of society is bilingualism.

B. Suggestions

After analyzing the data from YouTube channel, the writer understood that code switching is the process of switching the English vocabularies conducted by the video. The purpose is to the make the readers interesting.

For the students who have high interesting about sociolinguistics, especially studying of code switching, this paper can be helpful to give simple explanations and examples of code switching. Therefore, the student can distinguish whether it is code switching in the text. It is expected also that this paper will be one of references for them in understanding about code switching.

For the college, the writer expects this paper will be useful, and also can add references book in STBA JIA library. In order to make the

students easier doing their research, the writer suggested college to provide more books of sociolinguistics especially about code switching. The writer hopes while the students doing the research, they must not waste their time to find the references by visiting other universities, but they can find the reference in STBA JIA library.

For the lecturer, the writer expects this paper can be helpful to share the students some examples about how to know meaning, types and reason contain code switching based on Myers-Scotton and Chaer and Agustina's theory. The writer hopes that the lecturer can increase more exercise to expand student skill in this theory.
