

CHAPTER I

INTRODUCTION

A. The Background of the Research

English is a language in the world. Learning English become more and more important. Since it is known, English has important in every line of human life which can be used to communicate around the world. English in Indonesia has given since of elementary school up to university.

The role of language in our lives is very important because language is a tool of communication by human to convey their ideas to another person. Without language, people can have miscommunication. In this world there are many communities and there are many languages among them. Almost in all actions the human needs the help of language. As a language that is important in human life, it is no strange if there are more attentions for the problem in connection with language. Yet there is language as an International language which is used in almost of each country in the world that is English.

The language is important tools to communicate with other people. People can communicate with each other by using English. It brings idea, opinion, thoughts and felling. English is the first foreign language in Indonesia which play important to transfer and gain knowledge, science and technology, art and culture, and establish international relationship. Language is not static but languages have productiveness, open minded and

displacement characteristic in very sector in the world specially for making collaboration in looking corporation.

English is an International language, everyone in the world familiar with English, because until now English still number one languages which use to communicate among people that has different in mother language. Therefore, it's important to learn English. By using English well, People can communicate to others over the world. Besides, people can get knowledge to develop nation and country. Studying English can be started from vocabulary ability.

Vocabulary is a crucial component in acquiring and understanding language. It will sound good if people understand the world of vocabulary in reading text. It will help and guide in understanding the idea from text. In fact, it is the essence language, without vocabulary speakers cannot convey the meaning and communicate to each other in a particular language. Vocabulary is the stock of words used in language. Vocabulary a component of language that contains information is the meaning and usage of word in language. Ability of word process by a speaker is writer or a language.

Indonesian people learn English to communicate in two forms, in spoken and written forms. Mostly, Indonesian people feel difficult to study it, if someone wants to learn English very well, they should know four skills. They are listening, speaking, reading and writing. In this century, English seems to be one of the main languages used in international communication such as: Trading activities specially deal with transaction, sign of contract

work and cooperate with foreign company. In the fact, so many functions of English, either to run business and support employees. That is why English is very important for people not only for student at schools but also used at P1P2 Semi Production Auto Cutting and Crimping Department PT Furukawa Automotive Systems Indonesia. As it is known, Indonesia is one of the countries whose people are learning English because English gives many advantages in many fields, especially in business world. Indonesia becomes industry country, which make relationship with foreigner investor in the world nowadays. PT Furukawa Automotive System Indonesia is one of the Japanese Company but English is needed here for tool of making rejected report in P1P2 Semi Production Auto Cutting and Crimping Department for the research because in this department English is indispensable, especially about the usage vocabulary and writing on rejected report.

Likewise, in the industrial world especially in foreign companies English is an international language used by them to write on rejected report At P1P2 Auto Cutting and Crimping Department, English is very useful for making rejected reports. And if there are errors in writing data it will affect to the relevant department, and productivity will decrease. The company's progress can be seen from the success of its operations and a little reject rate. That is applied to do transactions in automatic crimping machines.

Base on the description, the writer would like to conduct a research entitled "The Correlation between Vocabulary Mastery and Writing on Rejected Report at P1P2 Semi Production Auto Cutting and Crimping

Department PT Furukawa Automotive Systems Indonesia.

B. The Question and Scope of the Research

1. Question of the Research

The Problem of the research is formulated into the following question: “is there any correlation between vocabulary mastery and writing on rejected report at P1P2 semi production auto cutting and crimping PT Furukawa Automotive Systems Indonesia?”

2. Scope of the Research

The author focuses correlation between vocabulary mastery and writing on rejected report the result of research to find out information and for knowing auto cutting and crimping at PT Furukawa Automotive Systems Indonesia.

C. Research Hypothesis

The Hypothesis of study is:

1. Ha: There is significant positive correlation between vocabulary mastery and writing on rejected report at P1P2 semi production auto cutting and crimping PT Furukawa Automotive Systems Indonesia.
2. Ho: There is no significant positive vocabulary mastery and writing on rejected report at P1P2 semi production auto cutting and crimping PT Furukawa Automotive Systems Indonesia.

D. The Object and Significances of the Research

1. The Object of the research

The research is to know whether there is a significant correlation between vocabulary mastery and writing on rejected report at P1P2 semi production auto cutting and crimping PT Furukawa Automotive Systems Indonesia.

2. The Significances of the Research

This research is conducted to find information whether how vocabulary mastery can correlate with writing on rejected report in P1P2 Semi production auto cutting and crimping PT Furukawa Automotive Systems Indonesia. The observant is expected to be significance as follow.

a. For the writer

The writer will get more knowledge in English especially in vocabulary mastery and writing. Besides the research is conducted not only to complete the paper bachelor degree of English literature at school of Foreign Language Japan Indonesia America (STBA JIA) but also when the paper finished, the result can identify and find the suitable way of toward writing and learning vocabulary.

By doing the research, the writer can study and get a lot the research, it hopes of experience and information to identify the problem of correlation between vocabulary mastery and writing on rejected report at P1P2 semi production auto cutting and crimping PT

Furukawa Automotive Systems Indonesia.

b. For the employees

The result the result of the study will provide a reference and reflection for employees, so their writing skills improved then the employees can increase score in learning writing and vocabulary at English. In the process research and after the result is given employees can learn and develop their vocabulary by practicing the correct methods in their learning. Beside that they will know the terms of work world especially term of the words rejected report in P1P2 Semi production Auto cutting and Crimping and it will be useful after they graduate.

c. For the readers

It is expected the Readers are able to increase the knowledge and experience to overcome the problem with correlation between vocabulary mastery and writing on rejected report. The reader can get some information about how to be good writer, they will know that there is Correlation between vocabulary and Writing, and they will know the English in industrial world in P1P2 Semi Production Auto Cutting and Crimping Department PT Furukawa Automotive Systems Indonesia.

E. Method of the Research

Creswell (2014) the research type of the study was Quantitative research is an approach for testing objective theories by examining the relationship among variables. These variables, in turn, can be measured, typically on instruments, so that numbered data can be analyzed using statistical procedures. The final written report has a set structure consisting of introduction, literature and theory, methods, results, and discussion. Like qualitative researchers, those who engage in this form of inquiry have assumptions about testing theories deductively, building in protections against bias, controlling for alternative explanations, and being able to generalize and replicate the findings (p. 31)

The author for this research use two variable is vocabulary ability (variable X) and writing report (variable Y) and get to the data result for test about vocabulary ability and writing report to employees of P1P2 Semi Production Auto Cutting and Crimping Department PT Furukawa Automotive Systems Indonesia.

F. Operational Definition

There are some important terms that were used in this study:

1. Vocabulary mastery.

A correlation is a single number that describes the degree of relationship between two variables and the ability is quality or skill that you have which makes it possible for you to do something.

Vocabulary is words which have meaning and considered as the central in language and it is a paramount importance to language learner because vocabulary is a basic of one learns a foreign language. Knowing a lot of word in foreign language is very important. The more words people know, the easier they will understand the foreign language. The smallest part of sentence is a word. A word is part of many vocabularies. The correlation is one of the most common and most useful statistics.

Vocabulary is the most important aspect which has to be mastered, because it is use in speaking, listening writing and reading. Vocabulary can be stated as a list or a series of words that is used to express the idea or in order meanings. It is used for general communication. Considering its definition, vocabulary serves important aspect to share their ideas through written or spoken away. Vocabulary mastery is easier than mastery of other component.

Vocabulary development is an important aspect of language development. Having different learning opportunities will help improve learners 'all language ability by improving their vocabulary. stated that vocabulary is embedded as one component of the measurement of a larger construct, such as communicative competence in speaking, academic writing or listening comprehension. An embedded vocabulary measure is one that contributes to the assessment of a larger construct.

2. Writing Report

Writing is creating an account or statement that describes in detail an event, situation or occurrence, usually as the result of observation or inquiry. Writing is the process of expressing and explore ideas, thinking or feeling in words on the piece of paper. By writing someone can express his thought more communicable to other. The two most common forms of report writing are news report writing and academic report writing. Report writing is different from other forms of writing because it only includes facts, not the opinion or judgment of the writer.

A report is written for a clear purpose and to a particular audience. Specific information and evidence are presented, analyzed and applied to a particular problem or issue. The information is presented in a clearly structured format making use of sections and headings so that the information is easy to locate and follow. The report brief may outline the purpose, audience and problem or issue that your report must address, together with any specific requirements for format or structure.

This guide offers a general introduction to report writing; be sure also to take account of specific instructions provided by your department. An effective report presents and analyses facts and evidence that are relevant to the specific problem or issue of the report brief. All sources used should be acknowledged and referenced throughout, in accordance with the preferred method of department.

Writing is a vital activity because it is a basic thinking. Writing become important for many people and professional, many aims in processing writing to show about what is about. like writing to publication on the newspaper, magazine, also for report of other writing task.

G. The Systematic of the Research

The systematic of writing means to present the paper in well edited composition, thus the writer decided to part this writing into the five chapters as follows:

Chapter 1 Introduction explain about the background of the research is the description of the causes of this research, The question and scope of the research gives of the border of the research, Research of Hypothesis, The objectives and significance of the research, Method of the research, Operation definition, The systematization of the research explains the structure of this research.

Chapter II Theoretical Description in this chapter discusses about the Language, Vocabulary definition, Writing definition, the correlation of vocabulary and writing report.

Chapter III Methodology of the Research in this Chapter describes about Time and place of the research, population and sample, Method of the research, Instrument and variable of the research, Technique of the data analysis, Data Analysis procedure.

Chapter IV Data Analysis in this Chapter presents about of the data description, the data analysis and the data interpretation.

Chapter V Conclusion and Suggestion In this chapter the writer gives summary based on the previous chapter gives conclusion and suggestion.
