

## CHAPTER V

### CONCLUSION AND SUGGESTION

#### A. Conclusion

After analyzing all the data that has been collected and analyzed from the film *Angels and Demons*, based on the data analysis above, the writer draws conclusions from the results of the completed thesis:

1. The final result in writing a thesis that discusses the types which portrayed of symbol. Writer managed to analyze 15 final data obtained from 1 film *Angels and Demons*. The data includes 15 Illuminati symbol data. The data includes 15 Illuminati symbol data in 2 symbol types. Conventional symbols with a total of 21.5% contain common symbols that are already known to many people. Then Personal symbols with a total of 78.5% contain symbols that are rarely known to the public, such as from certain religions.
2. In the study of his thesis, the writer mentions and describes the meanings contained in the Illuminati symbols displayed in *Angels and Demons*. Symbols have good or bad values hidden in the symbols considered for what they are used for. Symbols connect people with something else as the system is a form of culture in addition to the social system. A symbol is known as a good symbol because the symbol is made for a good purpose by means of

communication. Good values hidden in symbols explain good behavior and good things that happen in society and people in society know about symbols as symbols of good or good values hidden in symbols. While the bad value is represented as a bad symbol that explains some bad things, bad conditions, bad culture, or traditions that occur in society. People know about symbols as bad symbols because they have dark or bad meanings hidden behind them. Bad symbols are made for certain symbols and lead to bad or dark things from the Illuminati group, which is a secret society.

#### **B. Suggestion**

After this research is completed, the writer would like to give some suggestions to the readers, further writer and to the campus. It should take advantage of fun semiotics learning, such as learning through films or series. Moreover, the film *Angels and Demons* which aired in 2009 tells about the symbols of the Illuminati and many other symbols that can be found besides the Illuminati. The suggestions are as follows:

1. For Readers
  - a. The reader should study semantic science generally.
  - b. The reader should understand the semiotic elements.
  - c. The reader should understand about symbol, they are conventional symbol and personal symbol.

2. For Further Writer

- a. Further writer should study about the methodology of research generally.
- b. Further writer should understand about qualitative and quantitative methodologies.
- c. Should read a lot of research result from other sources.

3. For JIA STBA

- a. S1 and D3 English program study should inform the research result of student to lecturer.
- b. S1 and D3 English program study should give compulsory to lecturer to give information about the research to other student.
- c. S1 and D3 English program study should give task to the next student to open and to study the student research in the STBA JIA library.
