

## CHAPTER V

### CONCLUSION AND SUGGESTION

#### A. Conclusion

1. Indoglish phenomenon is often found in the South Jakarta. One of the reasons for the existence of the Indoglish form is because the Indonesian language has not found the right words when expressing their words. The Researcher thinks that learning new language is essential to face the modern era. After analyzing the result data of interviewing, the researcher found several reasons and factor the teenagers in South Jakarta often using Indoglish Language, such as according to a prestigious college, a way to adapt, wanting to be seen as middle class and above, following lifestyle and trends. Meanwhile, the motivating factors are participants, solidarity, social context and prestigious usage.
2. After analyzing the result data of interviewing, the researcher found two types of code mixing. First, it is namely Intra Sentential code mixing with 20 data types of Word and 15 data types of phrases. Second, it is Intra-lexical code mixing finds one kind of suffix. For levels of code mixing, the researcher found 20 data in the word level category, 13 data in the phrase level category, 1 data in the Baster level category, 1 repetitive data, and 1 data in the clause level category.

## **B. Suggestion**

Based on the result of the research and considering the previous conclusion, the Researcher would like to provide some of suggestions. Some suggestions are pointed to:
