

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

After analyzing the previous chapter, the writer finds Freddie Mercury's sexual behavior in the movie as a research character in the bohemian rhapsody movie. Deviant sexual behavior that changed his life. Based on data analysis found 20 data obtained from the movie, sexual behavior is a sexual urge or desire to get sexual pleasure through several behaviors from feelings of attraction to behaviors on dates, flirting, and sexual intercourse. Through the study of psychoanalysis by Freud which is a new view of humans in which the consciousness plays a central role. the author concludes as follows:

1. The character of Freddie Mercury found in the data has a sexual orientation that deviates from heterosexual which is a normal relationship in a pair with the opposite sex, namely Mary, to homosexual, namely having same-sex relationships or is included in the bisexual category. The sexual behavior that started when he met Paul Prenter who became his manager made Freddie, who has a hobby of music, become dim and not as energetic as before. days filled with wild parties, drugs, and same-sex promiscuity.
2. This analysis explains how Freddie Mercury's sexual behavior uses Sigmund Freud's psychoanalytic theory which discusses three levels of consciousness, namely conscious, preconscious and

unconscious. then three elements, namely id, ego, superego in this analysis of sexual behavior that occurs is an id where freddie has a sexual desire that exists instinctively and unconscious with his feelings until he is conscious of what he does. In this situation it is included in the preconscious category because it occurs between conscious and unconscious.

B. Suggestion

Based on the results of this study, after providing conclusions, the writer would like to convey the following suggestions:

1. For writers

Through this study, the writer gains knowledge about sexual behavior from its causes and consequences.

2. For another writer

The writer hopes that there are other writers who are interested in conducting research on sexual behavior. Hopefully this research can be a reference for another writer.

3. For the readers

The writer hopes that readers can understand more about the sexual behavior that occurs and avoid the impact that occurs. This research is expected to be information for readers, especially parents, to find ways to approach children and provide education from an early age about adolescent sexual behavior deviations so that they are careful in choosing relationships.
