

## CHAPTER V

### CONCLUSIONS AND SUGGESTIONS

#### A. Conclusion

After analyzing the meaning of denotation and connotation in The Jakarta Post newspaper, it has been concluded some conclusions based on the data research:

1. After analyzed the data the researcher found 22 data which is 14 word that have connotation meaning which mean another meaning besides the real meaning. 8 word that have same meaning with dictionary or denotation meaning.
2. 8 data links to denotation meaning that contained in The Jakarta Post newspaper. The denotation meaning has 37%. Although the researcher found connotation meaning data more than denotation but the majority of journalist write is contained denotation meaning to make the reader easy to understand the meaning. From Oxford Dictionary the researcher can explain the denotation meaning inside it. From the data, 14 data links to connotation meaning, and has 63%. The writer concludes that the connotation meaning relates to human stimulation. The connotation meaning of the analysis has been taken by dictionary, and the researcher knowledge that is appropriate with the text itself. That is why the meaning of connotation does not have a fixed perception. They have

more than one meaning, which is can be changed according to the text and user knowledge. Which contain connotative meanings have an important role in conveying the message to be conveyed from the article. The using of connotative in journalist written can stimulate the reader feeling.
