

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

After analyzing all the data that has been collected in the meme among us, the researcher finally draw conclusions based on the completed thesis:

It can be concluded that the meaning that is often contained in the Among Us meme is the parody meaning in the Among Us game storyline. representation of meaning that explain comparisons with other games and even the imagination of meme creators that represent situations of racial and political issues that people are talking about on the internet. In the end, the representation of the meaning contained in the Among Us meme is something that often happens within the scope of the Among Us game storyline itself to the social situation of the community along with the presence of hot news that emerges and becomes a public discussion on social media.

In studying this thesis, the researcher analyzes and describes the meanings contained in among us memes by determining the icons, indexes or symbols contained in the memes that have been collected.

B. Suggestion

After this research is completed, the researcher would like to give suggestions to the readers, future researchers and also the campus. The use of semiotics will be much more enjoyable if you have an unusual analytical container in researching semiotic approaches. These suggestions include:

1. For Readers
 - a. The reader should study semantic science generally
 - b. The reader should understand the semiotic element.
 - c. The reader should understand the elements of semiotic like icon, index and symbol.
2. For further researchers
 - a. Further researcher should study about the methodology of research generally.
 - b. Further researcher should understand about qualitative and quantitative methodologies.
 - c. Further researcher should read a lot of research results from other sources.

3. For STBA JIA

- a. S1 and D3 english study program should inform the research result of student to lecturer.
- b. S1 and D3 english study program Should give compulsory to lecturer to give information about the research to other student.
- c. S1 and D3 english study program Should give task to the next student to open and to study the student research in the environment of STBA-JIA.
