

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

After final interpreting the Schindler List film, this research would give some conclusions:

1. The racism that happen toward Jews by Nazi in the film happen by reason of the Jews prospered in business, science, education, the arts, and many more.
2. The impact of racism makes the victim often feel anxious, scared, depressed, and mentally unwell.
3. After interpreting the data that contains racial discrimination, the writer found 6 types of racial discrimination, are: (1) Verbal Antagonism and Profiling, (2) Statistical Discrimination and Profiling, (3) Organizational Processes, (4) Physical Attack, (5) Segregation, and(6) Extermination.
4. After identifying and classifying the types of racial discrimination in Schindler's List film, the writer found the most racial discrimination which happen in Schindler's List film is Physical Attack.

B. Suggestion

After finally have done the research in the Schindler's List film the writer just wants to give some suggestion for the students, readers, and teachers. It can be listed as follows:

1. For the students

For the student, especially who studies in literature it would be better if they know how racism happened by Nazi toward Jews in Poland.

2. For the readers

For the reader who fascinated about history and literature it would be better if they also know about the racism issue that happened in their place, or the racial discrimination that occurred around them, so that they know how to act and get over from its discrimination.

3. For the teachers

For the teachers, it would be better if they also teach the students about racism history and kinds of racial discrimination. They can also explain how the racism happens, what factors caused the racism and what the impacts to the victim. So, the students have more knowledge about the racism themselves.
