

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

After analyzing 30 data in the previous chapter and find the meaning equivalence between phrasal verbs and single verbs, it can be concluded that there are three forms of phrasal verbs. The conclusions of this research are presented in the following:

1. From the data analysis in the chapter 4. The writer finds three form of phrasal Verbs, there are V + Adverb, V + Preposition, and V + Adverb + Preposition. In the particle of adverb, the writer finds some particle such as *up, out, away, back down,* and *off*. Meanwhile, particle of preposition there are *on, in* and *for*.
2. The type of phrasal verb that found in the novel is Transitive Phrasal Verb and Intransitive Phrasal Verb. Transitive phrasal occur when there is object after phrasal verb or when the object inside of the phrasal verb. Meanwhile, Intransitive phrasal verb is phrasal verb that there is no object after the phrasal verb.
3. Based on form of phrasal verb above 30 data found in the *The Beginning of Everything* Novel by Robyn Schneider. It can be concluded that the result are V + Adverb has been found 24 (80%), V + Preposition has been 5 (17 %), and V + Adverb + Preposition has been (3%). The result shows the most

dominant of phrasal verb construction in the *Beginning of Everything* novel are V + Adverb.

4. All languages in the world have verbs functioning as predicate, these verbs which make differences whether the following words to be objects or without verbs to be predicative positions.
5. Linguistically, verbs have function as connector between subject and objects or adjuncts.

B. Suggestion

After drawing some conclusions of this research, the writer gives some suggestions in the following:

1. The Readers

This research is expected to provide more information and increase the reader's knowledge about phrasal verb and its forms, learn to classifying the types of phrasal verb, and identifying and describing the meaning of the phrasal verb in the context of the sentence.

2. The Next Researcher

This research is expected to be worthy work to look at and become one of the references for the next researchers. The research about phrasal verb is very interesting, because each of the phrasal verbs have much meaning depend on the context of the sentence. This research also can be observed with the same title with different objective or methodology by next researcher and

hopefully it can provide information on the references for the next researchers with the same topics.
