

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

After analyzing the data in the previous chapter, it can be concluded that there are so many kinds of grammatical words that consists of weak and strong forms in the songs by Bruno Mars. It is very importance to us to know more detail how the process of weak and strong forms itself and how to pronounce it correctly.

Classifying the grammatical words by the rules which the occurrence of weak and strong forms follows. The most common mistakes for Indonesian singer is when they are pronouncing in weak forms. There are certain contexts where only the strong form is acceptable, and others where the weak form is the normal pronunciation.

Strong forms usually occurred when it has position at the end of a phrase or sentence, for example the word *have* in the grammatical words has two form either as weak or strong form. in the sentence *You're all I have*, the word *have* here can be grouped as strong form with symbol /hæv/, while in the sentence *we don't have it anymore* as weak form with the symbol /əv/. It shown that the position of grammatical words in the sentence influences whether is categorized as weak or strong forms.

The auxiliary verb are usually in their strong forms when they occurred in negations with *not* or in contracted negations with *-n't*. Meanwhile they used in weak form when they themselves are contracted. Another rule is the auxiliary can be weakened to a degree where there is no vowel left. The remaining consonant maybe non-syllabic or not, usually occurred in the contracted form for example the symbol “v” of the word have in *I've* /ΔIV/.

B. Suggestion

Distinguishing in pronouncing weak and strong form is not easy. Non-native English speaker more often use strong forms when they are speaking in English language especially in grammatical words. Hence this research has aimed to make easier to understanding of weak and strong forms, so that the writer would like to draw suggestions of this research as follows

For the readers, the writer hopes will help them to know how to distinguish between weak and strong forms especially in the grammatical words. It is importance to learning the rules which the occurrence of weak and strong forms happen. This research make the readers understand when they have to pronounce a word into weak or strong forms.

For the writer, this research gives more information and knowledge about how to distinctive between weak and strong forms in the grammatical words as well. Besides, this research make easier in pronouncing speech rapidly so that the ability of pronunciation and distribution of weak and strong forms be better.

The next researcher, talking about sounds especially in the weak and strong forms is never end. There will always interested to do this research in the field of phonology. There are many aspects that can be discovered by weak and strong form in the grammatical words. This research hopefully can provide information on the references for the next researches with the same topics.
