CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

In this chapter, the writer finally made conclusions of data jargon used by online shop in Amazon.com, the writer proposes 5 conclusions:

1. The writer found 4 form of jargon such as acronym, abbreviation, word and phrase.

2. In the research, the writer analyzed word by word class such as noun, verb and adjective. For acronym and abbreviation the writer analyzed the word and the function used from the word.

3. The writer found 2 kind of meaning jargon such as connotative meaning and denotative meaning.

4. The meaning of the jargon found are 1 connotative meaning and 24 denotative meaning. The definitions of connotative meaning is a cultural or emotional meaning that is subjective and attached to a word or phrase and denotative meaning is a word or phrase that has meaning which is suitable to the dictionary.

5. The writer analyzed the function of jargon in accordance with the context that occured. Then, the function of jargon found are classified as a clear and unambiguous word or phrase function to refer the activities at Amazon.com as well as to provide words or phrase that

contain jargon used by members in a group and not including outsiders.

B. Suggestion

Based on the conclusions, the researcher proposes some suggestions to the following parties:

For the students who have study linguistics, especially in sociolinguistics, it is important to understand the concept of jargon including its form, function, and meaning. When they have understood it, they can get better understanding of jargon as one type of language varieties and increase their knowledge of sociolinguistics dealing with language varieties together with the terms.

For the lecturer especially lecturer in sociolinguistics field, the writer found that the material of sociolinguistics especially jargon given by the lecturer was sufficient. The writer hopes this paper can be helpful for the lecturer to give some example to the student who have interest about this topic and enrich knowledge for them.

Then, the suggestion is for the general people who have interist in sociolinguistic field especially in jargon. This paper can be a reference in understanding jargon theory and analysis.
