CHAPTER V

CONCLUSION & SUGGESTION

In this chapter contains about displaying the results of the research found and the discussion in the previous chapter. then, the writer will provide conclusions and suggestions to make it easier for readers to understand this research.

A. Conclusion

This research focuses on the type and meaning of metonymy. To summarize the results of the above questions, the writer uses Lakoff and Johnson's theory. Based on Lakoff and Johnson's theory, metonymy has 8 types. The writer randomly analyzes the data contained in The Jakarta Post in the sports column during January 2022. The writer makes a conclusion from the above analysis, as below:

1. Based on the results of the data analysis from a discussion, the writer found 6 types from 8 types contained in the sports column in The Jakarta Post are Object Used for User found 8 data (40%), then Institution for People Responsible found 5 data (25%), after that The Place for Institution found 4 data (20%), while The Part for The Whole, Controller for Controlled, and The Place for Event found 1 in each data (5%), for types The Face for The Person and Producer for Product there is no data found with (0%).

2. Based on the research obtained in the previous chapter, the writer explains the meaning of each piece of data exists. Such as object used for user for example PSG which explains the user through an object, then Institution for People Responsible for example Liverpool institution under the responsibility of a person, The Place for Institution Argentina explains about a place that describes an institution, The Part for The Whole for example Japanese describes a part but can describe the whole, after that Controller for Controlled example Ralf Rangnick explain one is responsible for what one controls, and then The Place for Event, for example, Melbourne explain a place that describes an event, the last The Face for The Person and Producer for Product no examples found in the above analysis. The results of the data that the writer found on the object of the data in the sports column

B. Suggestion

Metonymy in cognitive is very interesting learning because this metonymy gives another meaning from the actual meaning that involves the way human cognitive thinking will interpret the word. The use of metonymy can be used to write other papers, which makes the paper more interesting, persuasive, and quality, especially in newspapers. The writer hopes that writing a thesis that discusses the use of types of metonymy can be useful for everyone who wants to learn about Metonymy used in newspapers in sports columns, the writer hopes that this thesis will also make readers know more

about the use of metonymy in newspapers. The writer has suggestions for students, readers, and   the writer. To the student

The writer suggests that students who are very interested in metonymy in cognitive should study metonymy in detail. Metonymy is a very interesting field of semantics, by exploring more about metonymy and types of metonymy can help students make Metonymy a reference for future research with different data objects, from different theories, and further expand the discussion about metonymy.

1. To the readers

From straightforward to complex forms, metonymy is widely used in written works. It may be simpler for readers to understand the meaning of the words used in the written work if they are aware of the many varieties of metonymy. This study will make it simpler for readers to comprehend the meaning of each word that incorporates metonymy because each word or phrase has a different meaning.

2. To the writer

The writer hopes to further expand knowledge about metonymy in cognitive so that there are more references to the types of metonymy. the writer also hopes that this research will make it easier for students to facilitate an understanding of metonymy and get more references in the field of metonymy in cognitive.
