

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter discuss conclusion and conclusion which based on the result of data analysis and data interpretation.

A. Conclusion

From this chapter, the researcher made conclusion from the questions of the research.

1. Based on the question of the research that aims to know whether the implementation of WordPress is able to improve students writing ability for second semester students in STBA JIA, it can be concluded that WordPress improve students writing ability. From the average score, it is improved from 58,02 in pre-test to 69,86 in post-test cycle 1 which means the student average score increases 11,84. The student's improvement build up well from post-test cycle one to cycle two. The average score in post-test cycle two is 80. The average score increases 10,14. In student percentage, the student percentage raised 31.58% from pre-test to post-test cycle one. Student percentage got raised again in post-test cycle one to post-test cycle two. The student percentage improved 36.85%.

2. Based on the question of research that target to find out how the implementation of WordPress can improve writing ability for second semester students in STBA JIA, it can be determined that WordPress is really useful for the students because WordPress is easy to use as one of media for writing. The students manage their writing really well before the time provided ended unlike from pre-test. WordPress is an application that easy to access for the students. When the students did not bring laptop for writing WordPress, they can use in android or any other device. It also has an interesting feature such like change a type and a size of font. The students can make their creativity in their writing. When they make a mistake in their writing, WordPress can edit a text that already write and post. It also helps the students for revising their own writing. WordPress it the best way for using peer review. The students can check their own writing without looking each other, also they can put a correction in comment section as a discussion for each writing.

B. Suggestion

Based from this research, there are a few suggestions to improve the student's writing ability. In this result of the research is to give direction to the students and the reader.

1. For Students

It is suggested that student can respond well towards the implementation of WordPress since it can make the students increase their creativity and interest in writing. They can correct each other as peer review method. the students can share a creativity, a problem, and a knowledge about their writing. WordPress and peer review are the best way to make an improvement for interest and creativity in writing.

2. For Reader

Writing ability is really needed to improve because nowadays and a lot of students who have less interest in writing. Using WordPress as the implementation can increase the interest of writing. They can make more creativity in their writing. For peer review method, it is necessary to them because the students have more attention with their friends than the teacher.
