

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

In this chapter the researcher finally makes a conclusion of the morphological based on the non-neutral suffixes in the Harry Potter and deathly Hallows novel by J.K Rowling. The researcher only have 6 kinds of non-neutral suffixes such as -ity, -ic, -ian, -ous, and -ive in this novel. The most kinds of suffixes that researcher found is non-neutral suffixes -ity.

In this research the researcher found that the non-neutral suffixes -ous changed the meaning and word class to noun. Non- neutral suffixes -ity changed the meaning and word class to noun. Non- neutral suffixes -ic changed the meaning and word class to noun. Non- neutral suffixes -ive changed the meaning and word class to adjective. Non- neutral suffixes -ian changed the meaning and word class to noun all of the non-neutral suffixes changed the sounds and the stress to the base which they are attached. The researcher found more non-neutral suffixes in those novel. Non-neutral suffixes is a grammatical affix that can change the meaning and word class to noun, adjective or verb.

B. Suggestion

Based on the result of the research which has been obtained, some suggestions are stated for further research. The suggestions are presented as follows:

1. For students

The researcher encourages students pursuing formal education to learn about morphology as well as other fields of English to learn linguistics. This paper is expected to be one of their references for understanding morphology that contains non-neutral suffixes. As most of the words that we use daily are learned from morphology, the knowledge of morphology will be crucial in language learning.

2. For the readers

The researcher anticipates that this paper will be useful and that it will be possible to add reference books to the STBA JIA library. To make research easier for students, the author suggested that the college provide more linguistic books, particularly those on morphology. The author hopes that students conducting research will not waste time looking for references by visiting other universities when they can find them in the STBA JIA library. For lecturers, the author hopes that this paper will be useful in providing students with examples of non-neutral suffixes based on their morphological changes. The author hopes that the lecturer will add more exercises to help students improve their understanding of this theory.
