CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

The conclusions are described based on the writer questions in the first chapter, while the suggestions are intended to provide information to further researcher who are interested in analyzing the data using the same theory. After analyzing the data, it is concluded that there is a Head - Relations of Phrase in The Prince and The Pauper Novel by Mark Twain. There are types of phrase and head relation that occur in the analysis. This classification is formed using the theory of Burton for the Head Relation and Galderen for the Phrase. The conclusion can be drawn as follows:

1. The writer analyzed 25 data phrase that were used in the novel. The analysis's study findings were; The type of Noun Phrase (NP) appears more often that the other types with the percentage of 44%, the second Adjective Phrase (AdjP) with 12%, Verb Phrase (VP) with 24%, and Adverb Phrase (AdvP) 8% and Prepositional Phrase (PP) with 12%.

2. The writer analyzed 25 data Head-Relation that were used in the novel. The analysis's study findings were; The Modifier-Head Relation with sixteen data and 60% percentage and The Complement-Head Relation with nine data and 40% percentage.

B. Suggestion

In this research, the writer made a much of lack in both the theory and analysis, but the writer hopes this research can help the reader to know more about Phrase and Head-Relation.

1. For Researchers

It is shown for researchers who are interested in analyzing Head Relation of Phrase in novel. The first thing, the researchers must understand about syntax, phrase, and head relation. There are types of phrases and types Head Relation in this research.

2. For Readers

The reader should know that in the novel there are many interesting things to discuss and add knowledge, especially to the topics raised types of phrase and types Head Relation. Also, in this study, the word has been analyzed easily to be understood. Then understanding each element, it means understanding hierarchically and it is easy to tell each other. Thus, researchers hope that the results of this study will be able to provide valuable information and knowledge about syntax, especially phrase.
