

## CHAPTER V

### CONCLUSION AND SUGGESTION

#### A. Conclusion

The conclusions are described based on the research questions in the first chapter. At the same time, the suggestions are intended to provide information to next researchers who are interested in Prepositional Phrases. The researcher found some Prepositional Phrases in “CNN” news the theory from Quirk and the theory from Quirk are used in this research. The conclusion can be drawn as follows:

1. In Quirk's opinion one of the sentence components that serves to establish a specific relationship between other words in a sentence is the prepositional phrase. A preposition highlights the relationship between two elements, which is expressed by the prepositional complement, in order to make the phrase complete and intelligible. In this instance, it is simpler to pinpoint the time and location. In Prepositions have a crucial function in sentences for connecting with other words, as this study's findings demonstrate. Prepositions cannot stand alone; they require a prepositional complement, which may be a place name, a time, a pronoun, or a noun.
2. There Based on the 5 paragraphs studied, 20 prepositional phrases were found from 2 different articles from CNN News. Of the 5 forms of prepositional phrases in the 2 CNN News articles. It was found that the prepositional phrase spatial spectrum and purpose spectrum dominated the

most. Spatial spectrum has 7 prepositional phrases with a percentage of 35%, Likewise with the purpose spectrum which has 7 prepositional phrases with a percentage of 35%, Meanwhile, time spectrum, agentive spectrum and prepositional spectrum are the most minority. Time spectrum has 2 prepositional phrases with a percentage of 10%, Agentive spectrum has 2 prepositional phrases with a percentage of 10%, and Prepositional meaning has 2 prepositional phrases with a percentage of 10%.

## **B. Suggestion**

In this research, the researcher made a much of lack in both the theory and analysis, but the researcher hopes this research can help the reader learn more about syntax, especially Prepositional Phrase.

### **1. For Campus**

The author hopes that this research will provide benefits for the campus to support the provision of facilities for students which basically aims to add content to the field of science for the library so that students find it easier to find reference sources in research.

### **2. For Students**

The author hopes that those who aim to study linguistics, especially the branch of syntax, which focuses on prepositional phrases. The writer hopes that this research can help the students' learning process in understanding the concept and structure of the prepositional phrase.
