

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

The purpose of this research is to identify the main character in the film "Brave", especially to find out the main character's physical appearance and personality of her. In this movie, the main character is Princess Merida. The writer assumes that character is a person's innate in the form of a person's nature, personality, or behavior in everyday life. Some have good or bad characters. Eventually, based on the findings and analysis, the following conclusions can be drawn.

1. The film Brave tells the adventures of a princess named Merida. Princess Merida is a highly skilled archer who lives in the Scottish kingdom of DunBroch with her mother Queen Elinor, and her father King Fergus. Merida really likes challenging things, such as archery. Princess Merida's appearance is not like Princess in general, she has long, thick, curly red hair that is irregular. He had a small face, light blue eyes, and a sharp gaze, he was also tall and slender. Princess Merida has bright reddish skin. In her daily life, Merida wears a dark green dress.
2. This personality analysis cites Gordon Allport's theory which says there are seven personalities, from the first seven personality types that often appear, namely warm self-relationships with others, there are 9 data, the

second that often appears is self-understanding personality, which is 4 data. , third is realistic perception which is 3 data, fourth is 2 data of emotional security, the last type that appears is expansion of self-feeling, skills and tasks, unifying philosophy of life, which is 1 datum each. The most dominant of the seven personalities in the film Brave is a warm relationship with the Other Person. It is said that warm self-relationships with other people are more dominant because this film tells a lot about the relationship between Princess Merida and her mother, Queen Elinor.

B. Suggestion

In this study, the writer still makes many shortcomings both in theory and analysis. After getting the results of the analysis, the writer would like to give some suggestions:

1. For readers

Everyone is created with their own strengths and weaknesses. Humans are created differently both physically and in personality, this aims to distinguish the personality of each human being. It is recommended not to see or judge someone around us by looking at their physical appearance. It is needed to see someone in order to create a good relationship.

2. For Researchers

For further research that is interested in conducting research, this research can be used as a reference in characterization research, both

physical appearance, and personality. In this study, the writer studied the film Brave, a fictional film by Brenda Chapman. The writer also hopes that this research can provide benefits for students majoring in English Literature.
